Unnatural Issue Mercedes Lackey 2011-06-07 Mercedes Lackey's magical Elemental Masters series recasts familiar fairy tales in a richly-imagined alternate Victorian world Susanne Whitestone, an Earth Master magician, had always lived in Whitestone Manor and liked nothing more than to keep the land itself and its animal inhabitants thriving. For the last eleven years, she has had a special teacher in the forest—a powerful fae known only as Robin. Susanne, at twenty-one, doubted any mortal Earth Master could find fault with the practices that Robin taught her. But though Susanne was her father’s only child, she had never set eyes on him, for Richard Whitestone lived as a recluse in a sectioned off wing of the manor. Richard Whitestone was also an Earth Master, but since his beloved wife’s death in childbirth, he had lived a kind of half-life. He hated even the thought of the child who had ended his wife’s life. His own life had withered, and as he had grown bitter, and blighted, so had everything he could see from his windows—the once-beautiful private garden was now as stark and wizened as his heart. But as the years passed, Richard found that there was one thing that gave him solace—the thought, an obsession, that he could bring his Rebecca back to life through necromancy. He would need an appropriate vessel for her spirit, a young woman, preferably one who looked like she did and was approximately the same age that Rebecca has been at the time of her death—twenty-one....and Susanne was the image of her mother.

The story leads the reader from a pivotal Revolutionary War sea battle to a mysterious island where time seems irrelevant. Narrator Prescott Fielding, a 12-year-old boy from the 18th century, is washed ashore onto a volcanic island, where he befriends Caleb Thompson, a seventeen-year-old Vietnam War era U. S. Marine. How can two people born 200 years apart exist together at one time? Are they living in a time warp? Outside of time? Or is it the afterlife? Just as they work through their differences in perspectives, and as their friendship begins to flourish, a young World War I British Army code-breaker suddenly appears and upsets the balance. A series of events--both natural and unnatural--convince the characters to travel inland to seek answers about the mysteries of the island. Prescott soon discovers the function of the island is far more dangerous than he ever could have imagined, and standing between him and his dream to go home is a powerful and evil force." --Goodreads.

Karl's Story Trudy Cutrone 2016-01-13 With an uncanny relevance to today's world and inspired by the life of its author, Karl's Story, is a WW II child refugee's tale of resilience, hope and courage as told through the narrative of her beloved teddy bear, Karl .A story perfect for all ages: read to children by parents, grandparents and teachers alike. It has been read many times to middle elementary grades. A book to be handed down from parent to child to child for generations to come. Karl, "a very old teddy bear," has a magic gift- he can tell stories to children who are still young enough to understand toy talk . Karl's Story begins in Europe. It's about Karl, the young girl Karin, and Mimi the mind reading cat, ... how the three friends experience and survive WW II and then escape from communism to a new and hope-filled life with his beloved friend Karin .Their journey, their story, enchants children but in the sense of The Little Prince speaks timelessly to adults as well . Karl's Story tells of European refugees and is as relevant today as then. The chaos of the time turned the world of the three friends upside down, slowly at first, from no more whipped cream at birthday parties to ever more frequent air raids, crashing bombs, and a harrowing train ride, with Karl and Mimi stuffed in Karin's old wicker trunk. In the journey Karin loses all she ever knew or loved, but goes on to rebuild her world in America. The book is categorized as Children's Fiction because of its charming cover and talking stuffed animals but is inspirational to young and old alike, and a perfect antidote in these still troubled times; this is indeed a book for all.

The Serpent's Shadow Mercedes Lackey 2002-03-01 The first novel in Mercedes Lackey's magical Elemental Masters series reimagines the fairy tale Snow White in a richly-detailed alternate Edwardian England Maya Witherspoon lived most of the first twenty-five years of her life in her native India. As the daughter of a prominent British physician and a Brahmin woman of the highest caste, she graduated from the University of Delhi as a Doctor of Medicine by the age of twenty-two. But the science of medicine was not Maya’s only heritage. For Maya’s aristocratic mother Surya was a sorceress—a former priestess of the mystical magics fueled by the powerful and fearsome pantheon of Indian gods. Though Maya felt the stirring of magic in her blood, her mother had repeatedly refused to train her. “I cannot,” she had said, her eyes dark with distress, whenever Maya asked. “Yours is the magic of your father’s blood, not mine....” Surya never had the chance to explain this enigmatic statement to her daughter before a mysterious illness claimed her life. Yet it was Maya’s father’s death shortly thereafter that confirmed her darkest suspicions. For her father was killed by the bite of a krait, a tiny venomous snake, and in the last hours of her mother’s life, Surya had warned Maya to beware “the serpent’s shadow.” Maya knew she must flee the land of her birth or face the same fate as her parents. In self-imposed exile in Edwardian London, Maya knew that she could not hide forever from the vindictive power that had murdered her parents. She knew in her heart that even a vast ocean couldn’t protect her from “the serpent’s shadow” that had so terrified her mother. Her only hope was to find a way to master her own magic: the magic of her father’s blood. But who would teach her? And could she learn enough to save her life by the time her relentless pursuers caught up with their prey?

Elementary James M. Russell 2019-06-13 The periodic table, created in the early 1860s by Russian chemist Dmitri Mendeleev, marked one of the most extraordinary advances in modern chemistry. This basic visual aid helped scientists to gain a deeper understanding of what chemical elements really were: and, astonishingly, it also correctly predicted the properties of elements that hadn't been discovered at the time. Here, in the authoritative Elementary, James Russell uses his lively, accessible and engaging narrative to tell the story behind all the elements we now know about. From learning about the creation of the first three elements, hydrogen, lithium and helium, in the big bang, through to oxygen and carbon, which sustain life on earth - along with the many weird and wonderful uses of elements as varied as fluorine, arsenic, krypton and einsteinium - even the most unscientifically minded will be enthralled by this fascinating subject. Russell compellingly details these most basic building blocks of the universe, and the people who identified, isolated and even created them.

Reserved For The Cat Mercedes Lackey 2008-10-07 Mercedes Lackey's magical Elemental Masters series recasts familiar fairy tales in a richly-imagined alternate Victorian world Ninette Dupond was a dancer with the Paris Opera Ballet. She had been very lucky—if she had not been pretty, and a natural dancer, she could only have become what her mother had been: a washerwoman. But Ninette’s good luck ended the day that the lead dancer sprained her ankle and Ninette was chosen to dance her part at a matinee. Her reviews had been very good—too good. Shortly thereafter, Ninette had been fired in an attempt to soothe the wounded ego of the ballet’s primary soloist. Alone, unemployed, and filled with despair, Ninette had returned to her apartment to find a thin, rangy, tabby-striped tomcat sitting on her windowsill. He seemed like just another stray, until abruptly he spoke to her, mind-to-mind. Ninette though she was going mad, but the cat offered her an alternative to a

life of destitution, albeit a very odd one. He proposed that she impersonate a renowned Russian ballerina, Nina Tchereslavsky, and go to work in a specific music hall in Blackpool, England. The cat also told her that he would take care of her in every way—he would somehow convey the English and Russian languages to her, supply her with money, and guide her every move. With no other option open to her, she place her life in his paws. What Ninette didn’t know was that the cat was an Elemental Spirit sent to protect her, and that the music hall in Blackpool was owned by an Elemental Master. But she also didn’t know that the real Nina Tchereslavsky no longer existed. For the real Nina had been “absorbed” by an Elemental Spirit of the darkest kind that was now bent on Ninette’s destruction...

Blood Red Mercedes Lackey 2014-06-03 The ninth novel in Mercedes Lackey’s magical Elemental Masters series reimagines the fairy tale Red Riding Hood in a richly-detailed alternate Victorian world Rosamund is an Earth Master in the Schwarzwald, the ancient Black Forest of Germany. Since the age of ten, she has lived with her teacher, the Hunt Master and Earth Magician of the Schwarzwald Foresters, a man she calls “Papa.” Her adoptive Papa rescued her after her original Earth Master teacher, an old woman who lived alone in a small cottage in the forest, was brutally murdered by werewolves. Rosa herself barely escaped, and this terrifying incident molded the course of her future. For like her fellow Earth Masters of the Schwarzwald Lodge, Rosa is not a healer. Instead, her talents lead her on the more violent path of protection and defense— “cleansing” the Earth and protecting its gentle fae creatures from those evil beings who seek to do them harm. And so Rosa becomes the first woman Hunt Master and the scourge of evil creatures, with a deadly specialty in werewolves and all shapeshifters. While visiting with a Fire Master—a friend of her mentor from the Schwarzwald Lodge— Rosa meets a pair of Elemental Magicians from Hungary who have come looking for help. They suspect that there is a dark power responsible for a string of murders happening in the remote countryside of Transylvania, but they have no proof. Rosa agrees to help them, but there is a catch: one of the two men asking for aid is a hereditary werewolf. Rosa has been taught that there are three kinds of werewolves. There are those, like the one that had murdered her teacher, who transform themselves by use of dark magic, and also those who have been infected by the bite of these magical werewolves—these poor victims have no control over their transformative powers. Yet, there is a third kind: those who have been born with the ability to transform at will. Some insist that certain of these hereditary werewolves are benign. But Rosa has never encountered a benign werewolf! Can she trust this Hungarian werewolf? Or is the Hunter destined to become the Hunted?

The Dawn of Everything David Graeber 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of

the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the

human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations
